Why Choose Hosting 32 Over Traditional Hosting?

The Ultimate Comparison: Darkweb vs. Clearnet Hosting

> ⚠ **TOR BROWSER REQUIRED TO ACCESS HOSTING 32**
> Download from: **https://www.torproject.org**
> Our .onion website only works in Tor Browser

The Privacy Problem with Traditional Hosting

Traditional hosting companies require extensive personal information, log your activities, and can shut down your site at any time. They comply with government requests, monitor your content, and share your data with third parties.

> **Hosting 32 is different.** We provide true anonymous hosting on the darkweb with zero personal information required, no activity logging, and complete freedom over your content.

Feature-by-Feature Comparison

Feature	Traditional Hosting	Hosting 32
Personal Information Required	Name, address, credit card, phone, email	✓ **NONE - Completely anonymous**

Payment Methods	Credit cards (traceable)	✓ **Crypto only (BTC, XMR, ETH, LTC, SOL, TRX, USDT)**
Activity Logging	All activities logged and stored	✓ **Zero logs policy**
Content Restrictions	Heavy censorship, ToS violations, account suspension	✓ **Minimal restrictions (only DDoS/booters and K.P.)**
Government Requests	Must comply, hands over your data	✓ **Cannot comply - we have no data to give**
Setup Time	24-48 hours	✓ **Same day setup**
DDoS Protection	Basic or expensive add-on	✓ **10 TB/s included free**
Control Panel Access	Public internet (trackable)	✓ **Tor-only (anonymous)**
Domain Type	Regular domains (.com, .net - registered to you)	✓ **.onion domains (anonymous)**

Side-by-Side: What You Get

✗ **Traditional Hosting**	✓ **Hosting 32**
• Full name required	• No name needed
• Physical address required	• No address needed
• Credit card on file	• Crypto payments only
• Email verification	• Tor email only (optional)
• Phone verification	• No phone verification
• All activities logged	• Zero logs kept
• Content restrictions	• Minimal restrictions
• Can be shut down anytime	• Your content, your control
• Data shared with authorities	• No data to share
• Terms of Service violations = ban	• Freedom to operate

Real-World Scenarios

Scenario 1: Controversial Content

Traditional: Your site gets reported, account suspended, content deleted, personal info exposed.

Hosting 32: Your site stays online. We don't monitor content. Your identity protected.

Scenario 2: Government Request

Traditional: Company hands over all your data: name, address, payment info, IP logs, site content.

Hosting 32: We have nothing to give. No logs, no personal info, no cooperation.

> ### Scenario 3: Payment Privacy
>
> **Traditional:** Credit card statements show hosting charges. Bank knows what you're hosting.
>
> **Hosting 32:** Anonymous crypto payment. No paper trail. Complete financial privacy.

Who Should Use Hosting 32?

- ✓ **Privacy advocates** who value anonymity
- ✓ **Journalists** protecting sources
- ✓ **Whistleblowers** exposing corruption
- ✓ **Activists** in oppressive regimes
- ✓ **Entrepreneurs** starting darknet businesses
- ✓ **Anyone** who values freedom and privacy

Pricing That Makes Sense

No hidden fees. No personal info. Just simple, honest pricing:

- **Starter:** $50/month - 10GB, 100GB bandwidth, 1 domain
- **Business:** $100/month - 50GB, 500GB bandwidth, 3 domains, daily backups
- **Professional:** $150/month - 100GB, unlimited bandwidth, 5 domains, priority support
